

## Major Full-Scale Exercise with “K” LINE at KLSM Tokyo office on 6th Nov. 2009

On assumption of a VLCC in our fleet caused an oil pollution in Japan Territorial Waters, a major exercise was taken place on 6th November in Tokyo in combination with “K” LINE.

The scenario of exercise was that VLCC “SAKURAGAWA” collided with a general cargo ship as approaching to her discharging port, Kashima, in full-loaded condition, thus a good amount of cargo oil spilled into sea, and a crewmember on the opponent vessel was injured.

After confirming the emergency preparedness and response procedures in KLSM with close communication with “K” LINE and relevant external parties, “K” LINE conducted a mock press meeting involving some journalists and a maritime lawyer, in which participants learnt the media handling technique.
