

SIRE VETTING – Zero Observation Award

Since 2010 KLSM has awarded the vessels who received no negative observations at SIRE Vetting conducted by the Oil Majors. The awarded vessel receives a certificate of appreciation with all crew members name on it along with prize money.

It was a pleasant surprise that as many as 6 vessels in our fleet were awarded in 2010. That means those vessels cleared hundreds of check items in VIQ (Vessel Inspection Questionnaire) which divided into 12 chapters such as Safety Management, Crew Management, Document Management, Navigation, Mooring, Cargo Handling, etc.

It was a proof of high awareness of crew for the onboard safety and ship's quality, as well as fine leadership of senior officers including the master and the chief engineer.

It must be an honour for the vessel to be awarded; moreover, it provides a wonderful opportunity to the shore office to reward their continuous effort. We sincerely hope to present this award to as many vessels as possible.

To our delight, already 2 vessels were received this award in 2011. We constantly strive for the improvement of safety and quality in close cooperation between ships and offices.
